Eurolite's Stainless Steel range utilises Crabtree's capital power and control interiors which are fully design co-ordinated to offer consistent styling and inherent safety features across a broad range of applications.

Features include:

- Large concave rockers for ease of operation especially for the elderly and infirm
- Labyrinth switch design to minimise visible arc flash and prevents front access to live parts
- Large tunnels terminals with live and neutral angled for ease of wiring and to assist installation
- Socket outlets with twin earth terminals as standard for high integrity earthing
- Padlockable fused connection unit carrier for extra on-site maintenance safety
- Optional neon indicator for visual "ON"
- Positive drive action prevents balancing between ON and OFF position
- Double pole product marking on moulded rocker to easily identify once product has been installed
- Substantial silver alloy contacts for longer life and low contact resistance
- 3mm contact gap ensures safe means of isolation
- Individually boxed to protect product before installation
- Metal rockers to harmonise with the decorative plate finish
- Modular grid products enables units to be quickly and easily assembled to customers' individual specifications allowing several circuits to be controlled from a single position
