Work | Office | Leisure
24hr Energy Return Comfort

www.himalayanworkwear.com

Ditch the traditional safety footwear!

#GOwork is a new generation of composite safety footwear from Himalayan created with minimal fatigue and all day wear in mind.

This range comprises:

#Electro (ESD compliant)

#Bounce

#FlyKnit

Three new safety trainers with Ultimate Energy Return memory foam shock absorbing heels reducing fatigue and incredibly lightweight.

The new **#Urban** and **#Vintage** are contemporary Nubuck sneakers with a newly designed contoured insole for maximum comfort.

The **#GOwork** collection is completed with the new rugged waterproof **#Storm** and **#StormHi** safety boots designed for the toughest of uses.

#GOwork ist die neue Generation von Sicherheitsschuhen mit Fiberglaskappe aus der Himalayan Serie.

Das Sortiment umfasst:

#Electro (ESD-konform)

#Bounce

#FlyKnit

Drei neue Serien, mit einer Fersendämpfung aus Memoryfoam mit Energierückgewinnung, die ermüdungsarm und unglaublich leicht sind.

Die neuen Serien **#Urban** und **#Vintage** sind moderne Nubukleder-Sneaker mit einer neu geformten Einlegesohle für maximalen Komfort.

Die **#GOwork**-Kollektion wird durch die neuen robusten wasserdichten Sicherheitstiefel **#Storm** und **#StormHi** vervollständigt, die für härteste Beanspruchungen ausgelegt sind.

#GOwork est une nouvelle génération de chaussures de sécurité en composite, par HIMALAYAN, conçues pour une fatigue minimale et une tenue de tous les jours.

La gamme comprend:

#Electro (compatible ESD)

#Bounce

#FlyKnit

Trois nouvelles baskets de sécurité avec les talons amortisseurs « Ultimate Energy Return », en mousse à mémoire de forme, réduisant la fatigue et d'une légèreté incroyable.

Les nouvelles **#Urban** et **#Vintage** sont des baskets contemporaines en Nubuck avec une semelle intérieure profilée nouvellement conçue pour un confort maximal.

La collection **#Gowork** est complétée par les nouvelles bottes de sécurité robustes imperméables **#Storm** et **#StormHi**, conçues pour les utilisations les plus difficiles.

#GOwork es una nueva generación de calzado de seguridad de composite que Himalayan ha creado para uso diario reduciendo la fatiga al mínimo.

La gama comprende:

#Electro (ESD)

#Bounce

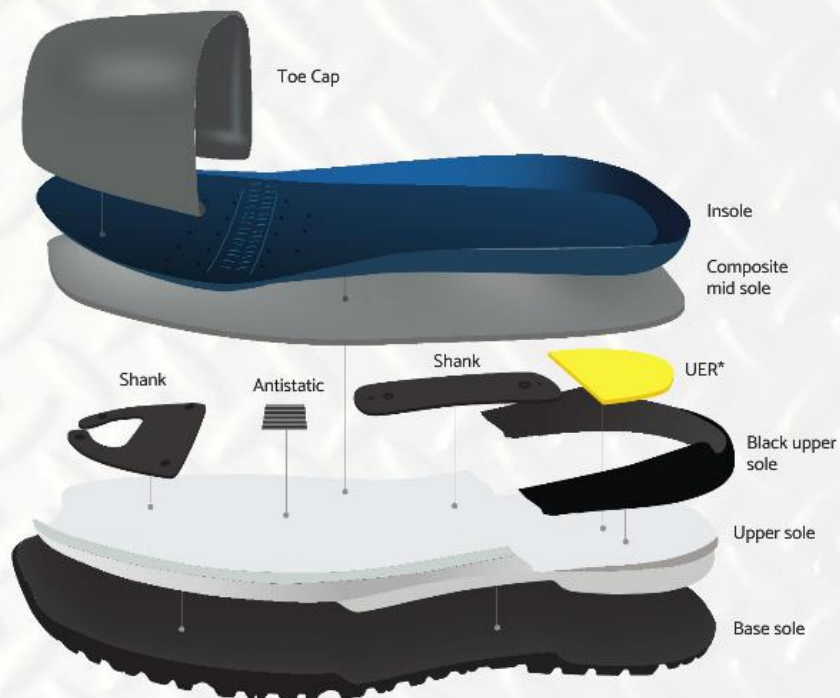

#FlyKnit

Tres nuevos modelos de zapatilla deportiva de seguridad con tacones de espuma con memoria de retorno de energía que reducen la fatiga y tienen un peso increíblemente ligero.

Las nuevas **#Urban** y **#Vintage** son botas urbanas de nubuck con una plantilla termoconformada de nuevo diseño para una máxima comodidad.

La colección **#Gowork** se completa con las nuevas botas de seguridad resistentes al agua **#Storm** y **#StormHi** diseñadas para los usos más exigentes.

What puts the bounce in **#Bounce**

*A carefully designed and constructed sole unit in the #Bounce, uses Ultimate Energy Return (UER) memory foam to absorb shocks and stress to the heel area reducing tiredness to legs and feet.

ESD Safety Footwear

Our #Electro safety footwear range are independently tested and certified as ESD compliant.

Safety Testing Details

Standards

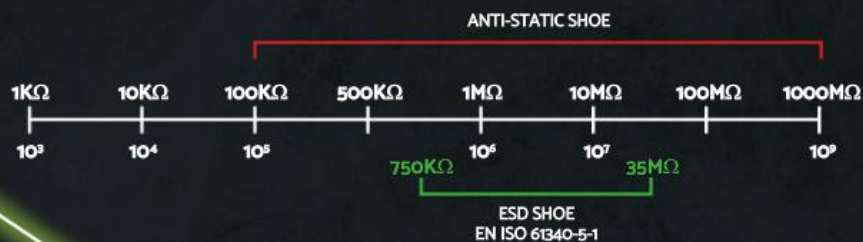

BS EN 61340-5-1:2106 & BS EN IEC 61340-4-3:2018

Preconditioning: 40°C ± 3°C, <15% R.H. for 72 Hours

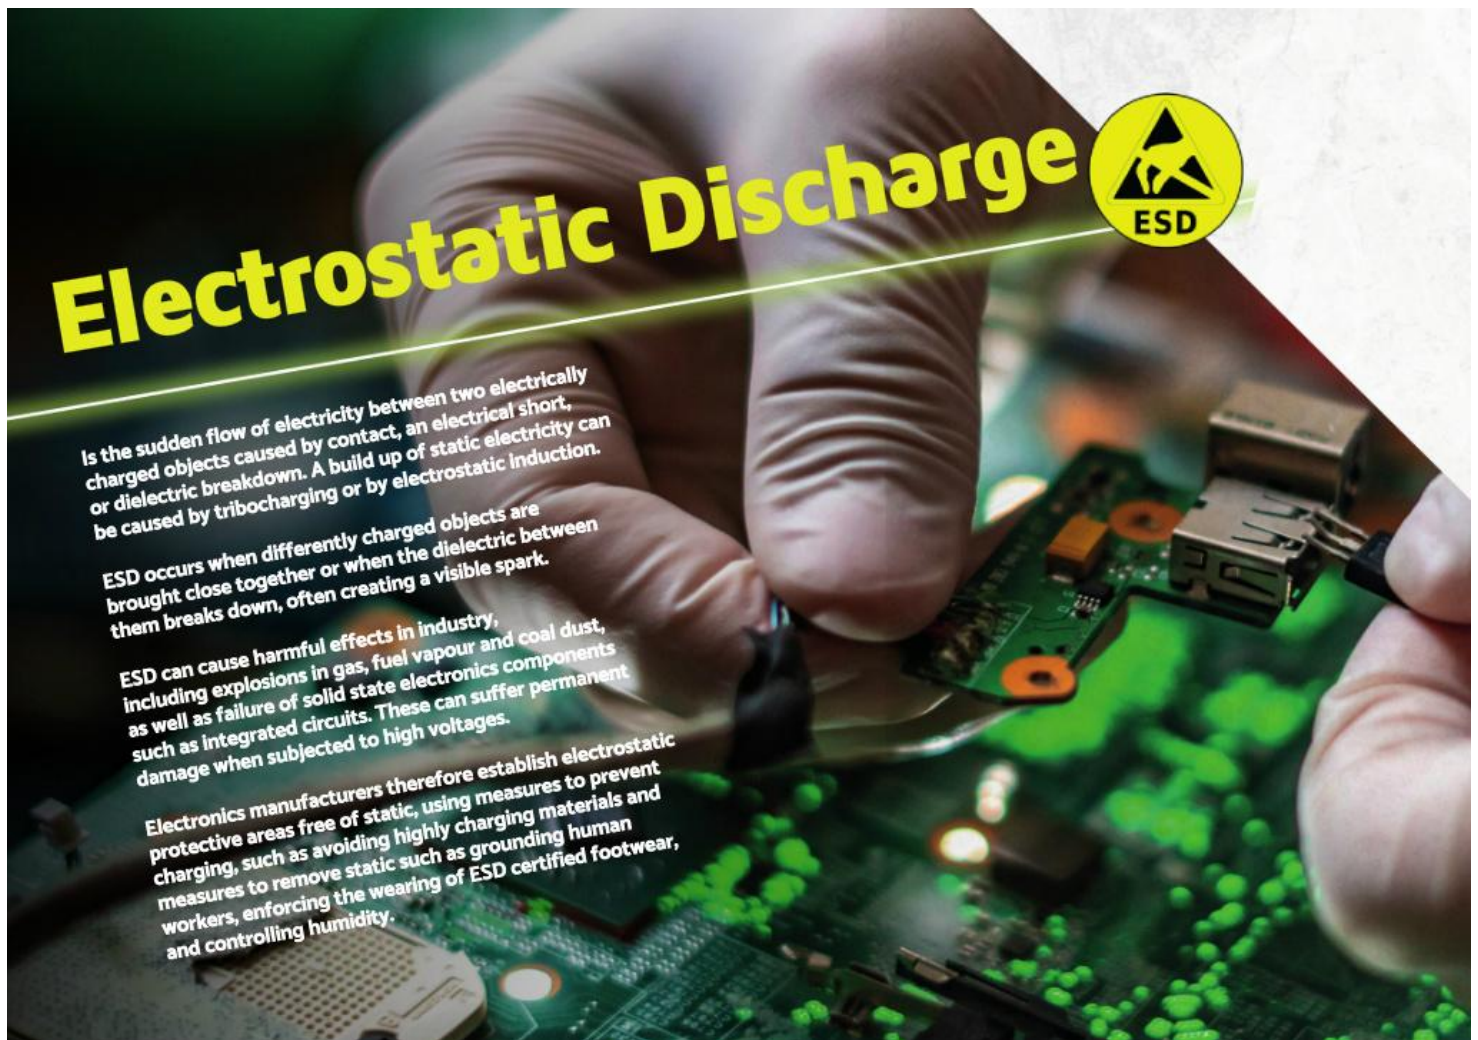

Conditioning: 23°C ± 3°C, 12% ± 3% R.H. for 72 Hours

Measurement: 23°C ± 3°C, 12% ± 3% R.H.

Voltage: 100V ± 5V

As ESD relates to meeting the requirements for the protection standard, the footwear labelling must be identified separately from the anti-static CE marking. Therefore, all ESD footwear which was been tested to the standards required features an additional ESD symbol. If the shoes do not feature this symbol, they are not tested to ESD certification.

Get the right footwear

The choice of safety footwear depends on the type of occupational risk. As with all footwear, additional safety features may be required such as penetration resistance, electrical resistance, heat resistance etc. These shoes are marked with the relevant industrial symbols

European Standards Footwear Classification

The principal classification of footwear is based on the level of protection offered by the footwear. The table below explains the standards in detail.

ENISO 20345

Safety Footwear. Highest protection. Toecaps tested to 200 joules for S classification.

S3

200 joule toecap protection. Closed seat region (fully enclosed heel). Antistatic properties. Energy absorption of seat region. Water penetration and water absorption resistance. Plus penetration resistance. Cleated outsole.

Reinforced toe cap

Anti slip sole

S1P

200 joule toe cap protection, closed seat region (fully enclosed heel), anti-static properties, energy seat region, penetration resistant midsole.

Penetration resistant midsole

Oil and fuel Resistant

METAL FREE

Composite to 200J toe-cap, midsole and eyelets.

Water repellent upper

Heat resistant outsole up to 300°C.

COMPOSITE

Composite toe-cap and midsole.

Fully waterproof

Anti-Static Sole

Depending on the test conditions chosen, footwear tested according to the EN standards is now marked with the one of the following codes, SRA, SRB, SRC.

The codes indicate that the footwear has met the specified requirements when tested as follows:

SRA

Tested on ceramic tile wetted with dilute solution

SRB

Tested on smooth steel with glycerol

SRC

Tested under both the above conditions

Footwear products once tested and certified are stamped with the CE mark. The manufacturer also provides user information indicating the applications for which the footwear is suitable.
